

# oxygenics®

# Evolution™

Green Product

SAVES 20-70%  
WATER AND ENERGY

### PUSH BUTTON SPRAY SELECTION

Inventive spray selection system enables you to simply click the button to change between spray settings. Your favorite spray is just a click away!

### 4 SPRAYS

Each of the four unique spray settings are designed to maximize the water coverage area and deliver powerful full-body sprays.

### ADJUSTABLE FACE

The innovative oval design delivers a wider spray than standard showerheads and the adjustable face allows you to switch between horizontal and vertical spray orientation for optimal body coverage.

The Oxygenics Evolution gives high-tech showering a whole new meaning! 4 pressurized spray settings coupled with a revolutionary push button spray selection system and rotating oval head design bring it to the forefront of showerhead engineering. This showerhead incorporates innovative technology and cutting-edge features to deliver a made-to-order shower experience.

There is no other showerhead brand on the market that uses the patented core technology of Oxygenics showerheads and no other showerheads are able to deliver the same powerful pressurized results.

The innovative design injects air into the water stream as the accelerator fin increases the velocity of the outbound water. The result is a powerful full-body oxygenated spray that feels amazing and saves water and money at the same time.

### FEATURES

Water Saving

Money Saving

4 Sprays

Easy Install

Lifetime Warranty

60" Hose

Wide Coverage

AVAILABLE FLOW RATES

2.5 GPM MAX

AVAILABLE STYLES

Handheld

AVAILABLE FINISHES

Chrome

Brushed Nickel

White

Gold

Oil Rubbed Bronze

## HANDHELD

MODEL	FINISH	MAX FLOW RATE
90827	Chrome	2.5
92827	Brushed Nickel	2.5
95827	White	2.5
93827	Gold	2.5
94827	Oil Rubbed Bronze	2.5

Includes: (1) Wand, (1) 60" Hose, (1) Holder, Teflon Tape, Installation Instructions

## FEATURES & BENEFITS

### Push Button Spray Selection

Switching between sprays has never been easier. The push button spray selection system makes toggling between spray settings as easy as a click of a button.

### Rotating Oval Head Design

The oval head creates a wider spray than standard showerheads and the adjustable face enables the option to switch between a long or wide spray orientation.

### Self-Pressurizing Technology

Increased water velocity + air induction = MORE PRESSURE. The patented design ensures an invigorating pressurized shower spray regardless of water pressure.

### Saves Water and Money

The Oxygenics Evolution uses 20-70% less water compared to industry leading brands. Each showerhead can save thousands of gallons of water per year which means significant energy and money savings.

### No Clogging - Zero Maintenance

The internal components are made of Delrin® - a material similar to Teflon® which increases durability and eliminates clogging, mineral build-up and corrosion. No cleaning or maintenance required!

### Limited Lifetime Warranty

The Oxygenics Evolution comes with a lifetime performance warranty against clogging. It's guaranteed not to clog - EVER.

Product dimensions: 17.8 x 12.7 x 10.8 cm

Weight: 900g

The Oxygenics Evolution Series meets ANSI standard testing and materials specifications A112.18.1M-1996.

Designed to function appropriately at pressures no less than 20 psi. Constructed to withstand pressures of 150 psi and temperatures up to 160° F.

The internal components are constructed of injection molded Delrin acetal. The pieces are machine pressed into the base and cannot be removed with a straight pushing or pulling force of less than 100 lbs.

The cores are constructed of Delrin acetal resin. Each core spray uses a venturi system consisting of 16 air entrance ports, which allow air to increase the spray velocity. Oxygen levels in the water are increased as well.

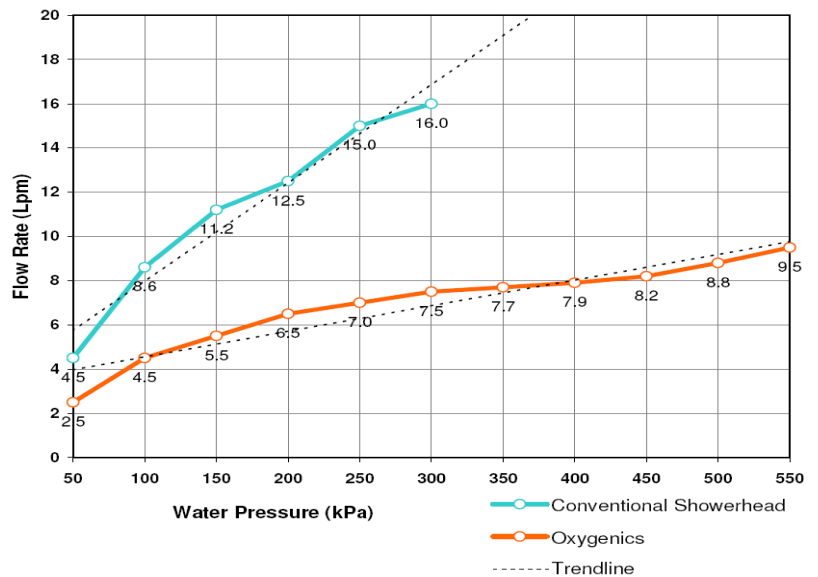

The showerhead face and outer shell is made of plated ABS plastic enhancing the showerhead's appearance and muffling the spray functions.

The wand holder utilizes a ball and socket allowing for adjustment. Ball is constructed with Delrin acetal. The seating washer is designed to seal around the ball swivel when compressed by assembly. Bases fit any standard 1/2" male threaded shower arm.

The 60" hose and holder are constructed of ABS plastic, aluminum, and zinc. Both are designed to withstand pressures of up to 100 psi.

Lifetime warranted against clogging and defective material and workmanship.

## Water Pressure / Showerhead Flow Rate Relationship Oxygenics and Conventional Showerheads Based on Official Eskom test results

Flow restrictors have been placed in showerheads by manufacturers as a way to keep water usage at 2.5 GPM since it was mandated by the U.S. Government in 1992. This method of water restriction significantly decreases water pressure creating unsatisfactory shower performance. Oxygenics showerheads contain no removable restrictors and adapt to the incoming water pressure to use only what is necessary while still providing an extremely enjoyable and pressurized shower which saves a significant amount of water, energy and money.

While other industry-standard showerheads flow at 2.5 GPM at 60 PSI (national water pressure average), the Oxygenics Evolution flows at 2.0 GPM at 60 PSI, offering 20% water savings. Not only is this savings significant in reducing water, but it also reduces energy costs as less hot water is used.

As illustrated in the chart above, Oxygenics showerheads adapt to the incoming water pressure, so as the pressure decreases, more water and energy savings can be expected compared to industry-standard showerheads that have a constant flow of 2.5 GPM. In some cases, as much as 70% water and energy can be saved by using Oxygenics showerheads..
